# MVC Classification for Homework 7

**Model:**

- CampusModel (entire class)

- CampusModel.MapNode (inner class)

- CampusModel.Building (inner class)

- CampusModel.PathSegment (inner class)

- CampusModel.BuildingInfo (inner class)

**View:**

- CampusPaths.CampusPathsController.listBuildings() (method)

- CampusPaths.CampusPathsController.displayPath() (method)

- CampusPaths.CampusPathsController.printWelcome() (method)

- CampusPaths.CampusPathsController.printMenu() (method)

- CampusPaths.CampusPathsController parts that output to the user (System.out.println() calls)

**Controller:**

- CampusPaths.main() (method)

- CampusPaths.CampusPathsController.run() (method)

- CampusPaths.CampusPathsController.processCommand() (method)

- CampusPaths.CampusPathsController.findRoute() (parts that process user input and call the model)

- CampusPaths.CampusPathsController.close() (method)

**None of the above:**

- Any test classes (CampusPathsTest, CampusModelTest, etc.)
